

## How To Install

To Install SonicSync on your Windows laptop, follow below guide carefully.

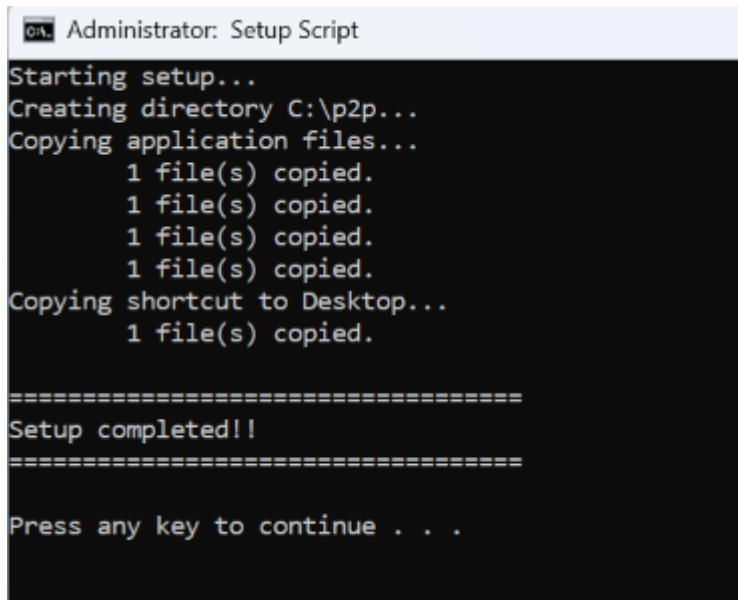

- 1) Navigate to your downloads folder and extract: “sonicsync-v1.zip” by right clicking the file and click on extract all.

- 2) Make sure the “Show extracted files when complete” checkbox is CHECKED.
- 3) Click “Extract”.
- 4) After extract, you will be greeted with these file as shown below.

| Name          | Date               | Type                  | Size   | Tags |
|---------------|--------------------|-----------------------|--------|------|
| icon.ico      | 18-Jun-26 9:52 PM  | ICO File              | 165 KB |      |
| index.html    | 18-Jun-26 9:44 PM  | Microsoft Edge HTM... | 16 KB  |      |
| launch.bat    | 19-Jun-26 9:50 PM  | Windows Batch File    | 12 KB  |      |
| qr.jpg        | 19-Jun-26 9:40 PM  | JPG File              | 7 KB   |      |
| uninstall.bat | 19-Jun-26 10:11 PM | Windows Batch File    | 2 KB   |      |

- 5) Right click on at the “setup.bat” not “launch.bat”.
- 6) Choose “Run as administrator”
- 7) When User Account Control ask “Do you want CMD to make change on your device”, click on “Yes”.
- 8) Once your setup is done, you will see the CMD window as shown below.

```
Administrator: Setup Script
Starting setup...
Creating directory C:\p2p...
Copying application files...
    1 file(s) copied.
    1 file(s) copied.
    1 file(s) copied.
    1 file(s) copied.
Copying shortcut to Desktop...
    1 file(s) copied.

=====
Setup completed!!
=====

Press any key to continue . . .
```

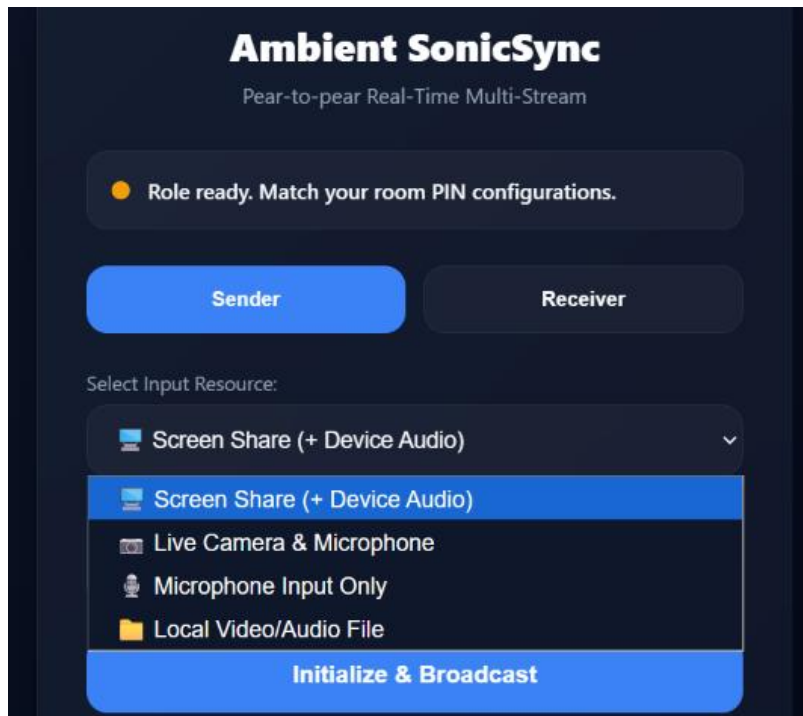

- 9) Press any key on your keyboard inside the Setup Script cmd to continue.
- 10) Now your setup is done! When you want to launch the app, go to your desktop and double click on the “SonicSync” shortcut.

## How To Use (Windows to Android / iPhone / iPad / another Windows)

To use SonicSync smoothly, follow below guides precisely.

- 1) Right click “**SonicSync**” on your desktop and **select “Run as administrator”**.
- 2) Choose “**Start SonicSync**”.
- 3) Switch to another CMD window and look for <http://10.X.X.X>. (NOT <http://192.X.X>)
- 4) On the **Android / iPhone / another Windows or iPad device, go to that URL**.
- 5) Once you’re loaded the <http://10.X.X.X> on other device, navigate back to the SonicSync CMD and press “ENTER” key.

- 6) **Select role** and **choose actions** on the **Windows device**.

- 7) On the **Android / iPhone / another Windows or iPad device**, select receiver as role.
- 8) On the **Windows device**, enter wanted pin and click on “**Initialize & Broadcast**”.
- 9) On the **Android / iPhone / another Windows or iPad device**, enter the pin and click “**Establish Stream Connection**”.
- 10) Just click full screen on the video and BOOM! You are done!

## Multi-device connection

- 1) Follow the steps like above but at the multiple other devices just join with the same pin with the host device. (Unlimited device connections)
- 2) Note: Other Windows device can't be sender if host from the other Windows device.

## How to install Node.js?

Here's a guide for you: <https://www.youtube.com/watch?v=lt5D2EWZMN0>

## How to uninstall?

Run uninstall.bat from “C:\p2p” and run as admin. Or you can also download from releases if uninstall.bat lost.

## What's need internet?

- First time use
